

DHEJASWINI S

sdhejaswini@gmail.com | linkedin.com/in/dhejaswini-s | github.com/dhej84 | Chennai, India

PROFILE

First-year B.Tech student at SRM IST Chennai with hands-on industry experience from a paid full-stack internship. Passionate about AI-assisted development, UI/UX design, and building real-world products. Skilled in end-to-end web development with both frontend and backend exposure. Driven by curiosity and a strong bias toward shipping fast.

TOOLS & TECHNOLOGIES

Programming Languages: Java, Python, JavaScript, HTML, CSS, SQL
Frameworks & Libraries: Spring Boot, Node.js, Express.js
Databases: MySQL (Relational), MongoDB (NoSQL), PostgreSQL
Dev Tools: Git, GitHub, VS Code, Figma, GitHub Pages, Render
AI Tools: Claude AI, Cursor IDE, Gemini, Google Antigravity (Agentic IDE)
Other: Prompt Engineering, Agentic AI Workflows, REST API Design

EDUCATION

SRM Institute of Science and Technology Chennai, India
B.Tech — Information Technology Expected May 2029
CGPA: 9.45 / 10 (Semester 1) | Semester 2 results awaited
Relevant Coursework: OOP, Data Structures, Web Technologies, Database Management
Indian Institute of Technology Madras (IITM) Chennai, India
BS in Data Science & Applications — Foundational Level Pursuing
Covers Mathematics, Statistics, Computational Thinking and Python — pursued alongside B.Tech.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer Intern Krutanic Solutions, Chennai, India
Paid Internship [Start Date] – [End Date]

- Developed full-stack web applications using Spring Boot, Node.js, HTML/CSS, and JavaScript in a live production environment.
- Worked with relational (MySQL) and NoSQL (MongoDB) databases for data modelling and backend API development.
- Built and integrated Python-based backend scripts as part of cross-functional development tasks.
- Gained hands-on experience with Git workflows, debugging, and end-to-end application deployment.

PROJECT HIGHLIGHTS

UXLearn — UI/UX Course Platform May 2026
Personal Project | github.com/dhej84/Antigravity-proj Live: dhej84.github.io/Antigravity-proj

- Built a full-stack self-paced UI/UX learning platform targeting college students and working professionals using Google Antigravity (agentic AI IDE).
- Designed 4 structured learning tracks: Product Design, Hackathon Skills, Creative UI, and AI-assisted Web Development.
- Deployed backend on Render with cloud PostgreSQL; implemented JWT auth, course enrollment, progress tracking, certificates, and referral codes.
- Managed complete Git workflow including branching, committing, and debugging; launch post gained engagement from Fortune 500 AI executives on LinkedIn.

Microplastics Research — Technical Paper 2026
Research Project SRM IST Chennai

- Co-authored a technical paper on microplastics, contributing to data analysis and formal academic research writing.
- Applied structured research methodology and data interpretation skills to produce a peer-ready academic submission.

ACHIEVEMENTS & ACTIVITIES

- Deployed first AI-assisted full-stack project live within 2 hours using Google Antigravity; LinkedIn post received traction from Fortune 500 AI professionals.
- Secured a paid full-stack internship as a first-year student — one of few in the cohort to gain industry experience in Year 1.
- Pursuing Data Structures & Algorithms via Striver's A2Z Sheet alongside active product development.
- Pursuing BS in Data Science from IIT Madras concurrently with B.Tech — demonstrating strong academic commitment.

CERTIFICATIONS

- [Add certifications here — e.g., Google UX Design, Meta Front-End Developer, AWS Cloud Practitioner]
